Open to: Data Scientist | Machine Learning Engineer | Data Analyst — Immediate Joiner

PROFESSIONAL SUMMARY

Data Scientist (B.Tech CSE, 2026) with hands-on experience across the full data science lifecycle — data cleaning, feature engineering, ML model development, evaluation/explainability, and BI dashboarding. Built an end-to-end, Generative-AI-powered automated ML web application (Streamlit + scikit-learn + SHAP + Google Gemini API) alongside BI/analytics projects spanning SaaS churn, social media, and traffic-safety analysis. Seeking a Data Scientist / Machine Learning role in Hyderabad.

TECHNICAL SKILLS

Languages & Querying: Python, SQL, MySQL
Machine Learning: scikit-learn, Random Forest (Classifier & Regressor), Train/Test Split, Cross-Validation, Label/Standard Encoding & Scaling, SMOTE (Class Imbalance Handling), Model Evaluation (Accuracy, R-squared, RMSE, MAE, ROC-AUC, Confusion Matrix, Classification Report)
Model Explainability: SHAP (Feature Importance & Impact Analysis), Feature Engineering (Interaction Features, Automated ID/Leakage Detection)
Generative AI & Deployment: Google Gemini API (LLM-based Automated Insight Generation), Streamlit (Interactive ML Web Apps), Model Persistence (Pickle), Prompt Engineering
Python Libraries: Pandas, NumPy, Matplotlib, Seaborn
SQL Concepts: CTEs, Window Functions, Joins, Subqueries, GROUP BY, HAVING, Aggregate Functions
BI & Visualization: Power BI, DAX, Power Query, Data Modeling, Dashboards, KPI Reporting
Excel: Pivot Tables, Pivot Charts, XLOOKUP, Data Validation, Data Cleaning
Core: Data Science, Statistical Analysis, Business Intelligence, Report Automation, Data-Driven Decision Making

EXPERIENCE

Deloitte Technology Virtual Internship — Forage | 2026

- Completed a job-simulation covering technology consulting and data solutions, working through a client-style case study on data-driven recommendations.

KEY PROJECTS

Generative AI-Powered Automated Machine Learning Web Application

Python, Streamlit, scikit-learn, SHAP, SMOTE, Google Gemini API

- Built a no-code, end-to-end data science platform in Streamlit that profiles any uploaded CSV (shape, data types, high-cardinality/ID-leakage detection) and runs an automated preprocessing pipeline — missing-value handling, encoding, scaling, interaction-feature creation, and SMOTE-based class imbalance correction.
- Trained Random Forest classification and regression models with train/test split and cross-validation; evaluated performance using accuracy, R-squared, RMSE, MAE, ROC-AUC, confusion matrix, and classification reports.
- Implemented SHAP-based model explainability to surface the top 10 most impactful features per prediction, going beyond default feature importance for more trustworthy, interpretable results.
- Integrated the Google Gemini LLM API to auto-generate natural-language data science reports covering dataset quality, key trends, feature insights, and business recommendations, and enabled one-click export of the cleaned dataset, predictions, trained model, and fitted scaler.

End-to-End SaaS Business Intelligence & Customer Churn Analytics Dashboard

Excel, MySQL, Power BI

- Cleaned and transformed SaaS business data in Excel/Power Query, then loaded it into MySQL for structured storage.
- Wrote SQL queries to prepare and retrieve data, connected MySQL to Power BI, and built 7 interactive dashboards (Executive Overview, Customer Insights, Subscription Performance, Revenue Analytics, Churn & Retention, Product Usage, Customer Support) using DAX measures, KPIs, slicers, and drill-through navigation.

Road Traffic Accident Analysis

Python

- Conducted end-to-end analysis of a road traffic accident dataset — applying data preprocessing, feature engineering, statistical analysis, and visualization to evaluate the impact of weather, vehicle type, and time of day, producing recommendations for accident prevention.

Social Media Analytics

MySQL

- Designed and executed complex SQL queries (JOINs, GROUP BY, HAVING, Aggregate Functions, Subqueries, CTEs, date functions) across a 7-table relational database to surface active users, top influencers, trending hashtags, engagement trends, and country-wise performance.

EDUCATION

B.Tech, Computer Science & Engineering — Parul University, Vadodara, Gujarat | 2022 – 2026 | CGPA: 7.0 / 10.0
Senior Secondary (Class XII, MPC) — Balaji Junior College, Narsampet, Telangana | 2020 – 2022 | Percentage: 90%
Secondary School Certificate (Class X) — SPR School of Excellence, Yellapur, Telangana | 2020 | GPA: 10.0 / 10.0

CERTIFICATIONS

SQL & Database Design — Infosys Springboard • Computer Networks & Internet Protocol — NPTEL • Power BI & Data Visualization
